

Grand River Energy Center
Combined Cycle Unit 3

CHARLES J. BARNEY CONTROL ROOM

This room is named in honor of
Charles J. Barney, P.E., GRDA Executive Vice President of Generation Projects.

Barney served GRDA from November 7, 1988 until December 31, 2017 with visionary leadership, extraordinary dedication, and an outstanding commitment to provide low cost and reliable power to GRDA customers. One of his many contributions was the successful construction of the Grand River Energy Center's Combined Cycle Unit 3, utilizing North America's 1st Mitsubishi Hitachi M501J Advanced Class Turbine, that set new standards for efficiency, reliability, and environmental emissions. His dedication to excellence, as represented by this unit, will continue serving as inspiration for future generations of power industry leaders.

- Dedicated November 8, 2017 -
